

Refrigerator Maintenance Comparison Guide

Max Appliance Repair Miami - Homeowner Guide 2026

Coil and Airflow Care

1 Freestanding coils

Clean every 6 to 12 months; access is easy at the back or kick plate.

2 Built-in coils

Clean every 3 to 6 months through the top or bottom grille.

3 Keep vents clear

A built-in depends on an unblocked grille; never crowd it.

4 Unplug first

Always disconnect power before cleaning coils or the fan.

Shared Fridge Upkeep

1 Check door gaskets

Wipe them clean and replace if cracked or loose for both types.

2 Change the water filter

Follow the schedule; on built-ins it is often behind a panel.

3 Manage humidity

Wipe condensation and keep the area dry in Miami's humid months.

4 Call a pro for cooling faults

Sealed-system and refrigerant work needs a licensed technician.
